Special Rules.

Westward trains are superior to eastward trains of the same class.

Eastward freight trains test air at Summit after cutting out helper.

Nos. 1, 2, 27 and 28 register by card at Blackfoot.

Register at Walton and Columbia Falls for trains originating and terminating at these stations.

Westward first class trains and extra passenger trains will make running test of air brakes descending False Summit grade, also a second running test passing thru Summit yard and know brakes are working before reaching heavy descending grade west of Summit.

Westward freight trains stop at Summit and trainmen will turn up retainers, test air brakes, and know that brakes are in proper working order before proceeding. Westward freight trains will use twenty minutes Summit to Blacktail and twenty minutes Blacktail to Nimrod.

Westward freight trains stop at Nimrod for inspection and turn down retainers.

Extra trains may use double track in the direction of current of traffic without running orders provided they secure proper clearance card Form A from Superintendent.

Normal position of main track switch at end of double track Whitefish is for westward track.

Westward trains using eastward track between Summit and Nimrod, must not exceed thirty (30) miles per hour.

Trains must not exceed thirty (30) miles per hour through Nimrod gauntlet.

All trains reduce speed to fifteen (15) miles per hour through Gauntlet ½ mile east of Pinnacle.

Nos. 1 and 2 stop at Belton and Glacier Park June 15th to September 15th, inclusive.

No. 1 stops Ft. Browning to discharge revenue passengers from points south of Shelby.

No. 2 stops on flag at stations west of Blackfoot to pick up revenue passengers for south of Shelby or east of Havre where No. 2 is scheduled to stop.

Normal position end of double track switch Columbia Falls is for westward main track. This is a spring switch and may be run through at not to exceed 15 miles per hour.

Location crossovers double track:

Summit facing points Blacktail facing Singleshot facing Nimrod trailing

Walton east crossover trailing west crossover facing Columbia Falls west crossover trailing east crossover facing

Half Moon trailing points.

Freight trains taking on helper engines must cut air through helper and have continuous air line through train. Helper engineers will cut out brake valve after air is cut through, leading engine must have brake control of entire train.

All trains will be handled under restricted speed and without regard to making schedule time at all points where slides or falling rocks are likely to be encountered.

Trains handling steam derrick, steel pile drivers or ditchers in train must not exceed a speed of 25 miles per hour at any point and 15 miles per hour over track with a curvature of 6 degrees or over. Booms to be in trailing position.

AUTOMATIC INTERLOCKING.

Nimrod Gauntlet just west of Nimrod. Pinnacle Gauntlet just east of Pinnacle. Pacific Junction end of double track. Kootenai Falls end of double track.

SPECIAL RULES GOVERNING OPERATION INTERLOCKING PLANTS.

Rules 671 to 671-F, inclusive, amended as follows:

The speed of trains through the approach and home signal zones of an interlocking plant shall not exceed 30 miles per hour.

Trains moving against current of traffic on double track through interlocking plants or where governed by dwarf signals shall not exceed 8 miles per hour. Conditions may require a further speed restriction for all trains per special rules, and at drawbridges the speed of trains shall not exceed 8 miles per hour. The letter "I" in column headed "SIGNS" indicates interlocking plant.

STANDARD INTERLOCKING RULES 601 TO 685, INCLUSIVE, SUPPLEMENTED BY THE FOLLOWING SHALL GOVERN IN THE USE OF AUTOMATIC INTERLOCKIING PLANTS.

NIMROD AND PINNACLE GAUNTLET INTERLOCKING.

If a train is stopped by a home signal and no immediate conflicting train movement is evident trainman shall proceed to telephone and there get in communication with train dispatcher and be governed by provisions of Rule 509-A.

When it is desired to release the plant, trainman shall proceed to home signal governing train movements in opposite direction at the other end of the gauntlet and operate hand release located in iron box marked "RELEASE" and locked with a standard switch lock. Turn knob to the right until stopped, hold few seconds and let go. Clockwork movement will return pointer to the zero or "NORMAL" position after a period of from one to two minutes. Under ordinary conditions the completion of the return movement should cause home signal to indicate "PROCEED."

If smash board on the route desired is in the "REVERSE" position and operation of hand release does not clear the proper home signal trainman shall signal his train to proceed over the gauntlet after making certain that home signal and smash board on the conflicting route is in the "NORMAL" position.

If smash board on the route desired is not in the "REVERSE" position and operation of hand release does not clear the proper home signal, trainman shall operate smash board to the "REVERSE" position by hand, and may then, if home signal desired does not indicate "PROCEED," signal his train to proceed over the gauntlet after making certain that home signal and smash board on the conflicting route are in the "NORMAL" position.

If train moving against regular current of traffic is stopped by home signal, trainman will operate release located in "RELEASE" box nearest the home signal and if signal does not indicate proceed when release returns to "NORMAL" position, trainman may flag train through gauntlet, making certain that smash board at opposite end of gauntlet is in the "REVERSE" position.

TO OPERATE SMASH BOARD MECHANISM BY HAND.

Attached by a chain to smash board mechanism located on separate mast at main line home signals is a small crank which may be placed over a shaft of operating mechanism after opening small door locked with a switch lock. Turn crank slowly to "LEFT" until smash board has been moved to clear position being sure the stroke has been completed. Remove crank and lock door. ALL APPARATUS MUST BE RETURNED TO NORMAL POSITION AND LOCKED WITH SWITCH LOCKS PROVIDED BEFORE LEAVING.

Westward trains delayed Nimrod may hold the plant for their use for a period of six minutes by using push button located at westward home signal.

Pinnacle gauntlet eastward trains on eastward track desiring to release plant for use of westward trains will do so by closing knife switch located in time release box on signal 1174.7, opposite eastward home signal. Knife switch must be open to permit clearing home signal for eastward trains on eastward track. There must be no failure to leave knife switch open after having used it.

Printed instructions governing the use of these plants may be found inside of cover of time release box.

SHELBY-Whistle Signals.

Single Track to Westward Main Track: 2 Long, 1 Short.
Single Track to Eastward Main Track: 1 Long, 1 short, 1 Long.
Switching Lead to Eastward Main Track: 1 Long, 4 Short.
Eastward Main Track to Single Track: 1 Long, 1 Short.

(

Eastward Main Track to Switching Lead: 1 Long, 4 Short. Westward Main Track to Single Track: 1 Long, 1 Short, 1 Long.

Call for Operators to clear dwarf signals for route to or from Lead to South Passing Track: 1 Long, 4 Short.

Switch at East End of South Passing Track is hand operated switch.

BLACKFOOT-Whistle Signals.

From Single Track to Eastward Main Track: 1 Long, 1 Short. From or to Eastward Siding: 1 Long, 4 Short.

Trains moving against current of Traffic: 1 Long, 1 Short, 1 Long.

From Westward Main Track to Single Track: 2 Long, 1 Short. From or to Westward Siding: 2 Long, 4 Short.

SUMMIT.

Interlocking plant end double track Summit, controls main track switch end double track.

Eastward home interlocking signal will also operate as home automatic block signal.

Westward home interlocking signal will also operate as intermediate automatic block signals as per Rule 515.

Following whistle signals will govern in using plant, which is controlled from station:

Single Main Track to Westward Main Track: 2 Long, 1 Short. Single Main Track to Eastward Main Track: 1 Long, 1 Short,

Westward Main Track to Single Main Track: 1 Long, 1 Short, 1 Long.

Eastward Main Track to Single Main Track: 1 Long, 1 Short.

SPECIAL RULES—Continued.

RED EAGLE.

Interlocking plant controlling main double track switch, east end of westward siding and eastward end of eastward siding just west of station, will be governed by following whistle signals:

Eastward

From Single Main Track to Eastward Main Track: 1 Long, 1 Short.

From Eastward Siding to Eastward Main Track: 1 Long, 4 Short.

From Single Main Track to Westward Main Track: 1 Long,
1 Short, 1 Long.

Westward.

From Westward Main Track to Single Main Track: 2 Long, 1 Short.

From Westward Main Track to Westward Siding: 2 Long, 4 Short.

From Eastward Main Track to Single Track: 1 Long, 1 Short, 1 Long.

Trains moving eastward from westward siding will be governed by hand signals from operator.

Interlocking plant is operated from station.

BUSINESS TRACKS NOT SHOWN AS STATIONS ON TIME TABLE.
